

S11、S13 Series 11KV Oil-Immersed Distribution Transformers

S11、S13系列 11千伏级油浸式配电变压器

Product introduction:

S11 and S13series 10 kV oil-immersed distribution transformers are new products that meet international standards. The products use imported high-permeability cold-rolled silicon steel sheets, protective resin covering the surface of the iron core and vacuum drying technology to prevent moisture and rust; the product adopts The non-hanging structure can withstand the bumps during transportation to the greatest extent and is one of the most energy-saving products produced by the company.

Normal conditions of use:

Altitude up to 1000m
Max. ambient Temp.: +40°C
Max. daily average Temp.: +30°C
Max. annual average Temp.: +20°C
Min. outdoor Temp.: -25°C

产品简介：

S11、S13系列10千伏油浸式配电变压器是符合国际标准的新型产品，产品采用进口高导磁冷轧硅钢片，防护树脂覆盖铁芯表面及真空干燥技术以防潮、防锈；产品采用不吊心结构能最大程度的承受运输过程中的颠簸，是公司生产最节能的产品之一。

正常使用条件：

海拔高度不能超过：1000m
最高环境温度：+40°C
最高日平均气温：+30°C
最高年平均气温：+20°C
室外最低温度：-25°C

S11、S13 Series 20KV Oil-Immersed Distribution Transformers

S11、S13系列 20千伏级油浸式配电变压器

Product introduction:

20KV oil-immersed distribution transformer is an important equipment in the power distribution network and the power supply and distribution system of industrial and mining enterprises. Transformers are widely used in industrial and mining enterprises, agriculture and civil buildings. They can also be used for oily and chemical substances in the petroleum and chemical industries. Place.

The low-voltage winding with a capacity in the range of 630~2000kVA adopts a cylindrical or spiral structure, with high mechanical strength, balanced ampere-turn distribution, and good short-circuit resistance of the product. A positioning structure is added to the body to prevent displacement during transportation. At the same time, all fasteners are equipped with fastening nuts to ensure that the fasteners are not loose during the long-term operation of the product, which meets the requirement of not hanging the core.

产品简介：

20KV油浸式配电变压器为配电网络与工矿企业供配电系统中的重要设备，变压器在工矿企业、农业和民用建筑中广泛使用，也可用于石油、化工行业中多油污、多化学物质的场所。

容量在630~2000kVA范围内的低压绕组采用筒式或螺旋式结构，机械强度高，安匝分布平衡，产品的抗短路能力好。器身追加了定位结构，使之在运输过程中不产生位移，同时所有紧固件加装扣紧螺母，确保产品在长期运行过程中紧固件不松动，满足了不吊芯的要求。

S11、S13 Series 35KV Oil-Immersed Distribution Transformers

S11、S13系列35千伏级油浸式配电变压器

Product introduction:

35 kV oil-immersed transformer is an important component of the 35 kV voltage level transformation of the power grid. It has high requirements for its reliability, economy, and energy saving. This series of products has the characteristics of fast heat dissipation, low loss and low cost, and is widely used in electronics Industrial, medical, power plant, high-rise buildings and other places

产品简介：

35 kV油浸式变压器作为电网35 kV电压等级变换的重要元件,对其可靠,经济,节能等性能具有较高要求.该系列产品具有散热快,损耗小,成本低等特点,广泛应用于电子工业、医学、电厂、高层建筑等场所

Executive standard:

SZ9、SZ11 Series 110KV Oil-Immersed Distribution Transformers

SZ11、SZ13系列110千伏级油浸式配电变压器

Product introduction:

The 110kv three-phase oil-immersed power transformer is manufactured in accordance with the International Electrotechnical Commission standard IEC76 and the People's Republic of China standard GB1094.1-2-1996/GB1094.3,-1985. This series of products have excellent impact resistance, good mechanical properties, strong short-circuit resistance, low noise, low loss, good sealing performance, and low maintenance.

产品简介：

110kv三相油浸式电力变压器依据国际电工委员会标准IEC76和中华人民共和国标准GB1094.1-2-1996/GB1094.3,-1985制造。

本系列产品具有优良的耐冲击性能，机械性能好、抗短路能力强，低噪音、低损耗、密封性能好、少维护等特点

Executive standard:

Single Phase Oil Immersed Transformer

单相油浸式变压器

Product Features:

Singles phase transformer has the characteristics of high efficiency and low loss, can save a lot of power consumption and operating costs, and has significant social benefits. It is a popularized new technology product.

Based on the traditional structure and mature technology, our company has made many improvements, such as:

- 1) Spiral coil with longitudinal oil passage, better internal heat dissipation;
- 2) Improved the effective support of the coil end surface, and the ability to resist short-circuit current is stronger;
- 3) The new hoisting structure and body positioning structure are adopted to ensure more reliable in long-distance transportation and operation;
- 4) We have many unique and reliable structures to serve you;
- 5) Selecting a transformer with a higher performance level will have a higher level of technical content.

Scope of application :

Suitable for commercial centers, schools, railways, airports, factories, tunnels, subways, high-rise buildings, petrochemicals and other places to meet various power supply needs of towns

产品特点：

该单相变压器产品具有高效率、低损耗的特点，可节省大量的电力消耗和运行成本，具有显着的社会效益。是一种大众化的新技术产品。

我公司在传统结构和成熟技术的基础上，做了很多改进，如：

- 1) 螺旋线圈纵向油道，内部散热更好；
- 2) 改进了线圈端面的有效支撑，抗短路电流能力更强；
- 3) 采用新型吊装结构和车身定位结构，保证长途运输和作业更可靠；
- 4) 我们有许多独特可靠的结构为您服务；
- 5) 选择性能等级较高的变压器，技术含量会更高。

适用范围：

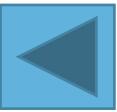

适用于商业中心、学校、铁路、机场、工厂、隧道、地铁、高层建筑、石油化工等场所，满足乡镇各种供电需求

SCBH15 series Amorphous Alloy Dry-type Transformer

SCBH15系列非晶合金干式变压器

Product introduction:

Amorphous alloy dry-type transformers are new energy-saving transformers that use new magnetic materials (amorphous alloys) to make cores. Compared with the transformer with silicon steel sheet as the core, the no-load loss is reduced by more than 70%, and the no-load current is reduced by about 80%. It is the current distribution transformer with ideal energy-saving effect, and is especially suitable for rural power grids and developing regions with low load rates. The place.

Advantage:

- (1) Isotropic soft magnetic materials;
- (2) The loss is very low, about 30% of the silicon steel sheet;
- (3) High resistivity, about 3 times that of silicon steel sheet;
- (4) The subsequent processing is convenient (the subsequent processing can obtain the required magnetic properties);
- (5) The manufacturing process is environmentally friendly.

产品简介：

非晶合金干式变压器是用新型导磁材料(非晶合金)制作铁心的新型节能变压器。它比用硅钢片作为铁心的变压器空载损耗下降70%以上，空载电流下降80%左右，是目前节能效果较理想的配电变压器，特别适用于农村电网和发展中地区等负载率较低的地方。

优点：

- (1)各向同性的软磁材料;
- (2) 损耗很低，约为硅钢片的30%;
- (3) 电阻率高，约为硅钢片的3倍;
- (4) 后继工艺处理方便(后继处理能得到所需要的磁性);
- (5)制造工艺环保性好。

SGB Series Non-encapsulated Dry-Type Transformer

SGB 系列非包封干式变压器

Performance introduction :

SG(B)10/SG(B)11 series H-class non-encapsulated dry-type power transformers are open-type dry-type transformers manufactured using the American UL-certified NOMEX paper insulation system and vacuum pressure impregnation (VPI) technology. The voltage level is 20kV and below, and the product capacity ranges from 100 to 5000kVA. It is widely used in high-rise buildings, commercial centers, industrial and mining enterprises, petroleum platforms, subways, tunnels and other places.

Features:

1. Manufactured by vacuum pressure impregnation (VPI) process, air-cooled or air-cooled.
2. High insulation level: The heat-resistant insulation level of the transformer can reach H or C level.
3. Safe and reliable: the material is flame-retardant, self-extinguishing, fire-proof and explosion-proof.
4. Reliable performance: moisture-proof, mildew-proof, and smoke-proof, and can withstand thermal shock, never cracking, and no partial discharge.
5. Strong overload capacity: the coil structure has good heat dissipation, and the insulating material is not easy to age.

产品介绍：

SG(B)10/SG(B)11系列H级非包封干式电力变压器是一种采用美国UL认证的NOMEX纸绝缘系统、真空压力浸漆(VPI)工艺制造的敞开式干式变压器，电压等级为20kV及以下，产品容量范围100~5000kVA，广泛适用于高层建筑、商业中心、工矿企业、石油平台、地铁和隧道等场所。

产品特点：

- 1.采用真空压力浸漆(VPI)工艺制造，空气自冷或风冷。
- 2.绝缘等级高：变压器耐热绝缘等级可达到H级或C级。
- 3.安全可靠：材料阻燃、自熄，防火防爆。
- 4.性能可靠：防潮、防霉，防烟雾，更能承受热冲击，永无龟裂，无局部放电。
- 5.过载能力强：线圈结构形式散热好，绝缘材料不易老化。

SCB10、SCB11 Series 10Kv、11Kv Dry Type Transformer

SCB10、SCB11系列10千伏、11千伏干式变压器

Product introduction:

The SCB dry-type distribution transformer uses a thin layer of epoxy resin to seal the high and low-voltage winding dry-type transformers. It has the advantages of flame retardant, self-extinguishing, moisture-proof, and good heat dissipation. It can penetrate into the load center and is suitable for high-rise buildings. Various places such as airports, docks, power plants, residential communities or complete substations

产品介绍：

SCB型干式配电变压器用薄层环氧树脂浇注来封高，低压绕组的干式变压器，具有阻燃、自熄、防潮，散热性好等优点，可以深入负荷中心，适用于高层建筑、机场、码头、电厂、住宅小区或成套变电站等各种场所

Performance characteristics:

SCB10: No-load loss is 10% lower than the standard value of GB/T10228-1997 Group I

The load loss is 10% lower than the standard value of GB/T10228-1997

SCB11: No-load loss is 20% lower than the standard value of GB/T10228-1997 Group I

The load loss is 15% lower than the standard value of GB/T10228-1997

性能特点：

SCB10: 空载损耗比GB/T10228-1997组I标准值下降10%
负载损耗比GB/T10228-1997标准值下降10%

SCB11:空载损耗比GB/T10228-1997组I标准值下降20%
负载损耗比GB/T10228-1997标准值下降15%

SCB10、SCB11 Series 20Kv Dry Type Transformer

SCB10、SCB11系列20千伏干式变压器

Product introduction:

The performance index of Xinghe brand 20KV SCB10 series dry-type transformers meets various standards. It has been proved by users to operate reliably and reach the advanced level. This series of products adopt foreign advanced manufacturing technology, complete, correct and fresh design drawings and technical documents, advanced production equipment, stable manufacturing technology, and complete measurement methods, which provide a solid guarantee for the production of high-quality products.

Performance introduction:

1. Low loss, good power saving effect, maintenance-free
2. Safe, non-flammable, fireproof, no pollution, can be installed directly in the load center
3. Maintenance-free, easy to install, low overall operating cost
4. Good moisture-proof performance, can operate normally under 100% humidity, and can be put into operation without pre-drying after shutdown.
5. Low loss, low noise, strong heat dissipation capacity
6. Equipped with a complete temperature protection control system to provide a reliable guarantee for the safe operation of the transformer.
7. Small size, light weight, small footprint

产品介绍：

星合牌20KV级SCB10系列干式变压器其性能指标符合各项标准，经用户使用证明，运行可靠，达到家先进水平。该系列产品采用外先进的制造技术，设计图纸及技术文件齐全、正确、清新，生产设备先进，制造工艺稳定，测定手段完备，为生产优质的产品提供了坚实的保障。

性能特点：

1. 损耗低，节电效果好，可免维护
2. 安全，难燃防火，无污染，可直接安装在负荷中心
3. 免维修，安装简便，综合运行成本低
4. 防潮性能好，可在100%湿度下正常运行，停运后不经预干燥即可投入运行。
5. 损耗低，噪音小，散热能力强
6. 配备有完善的温度保护控制系统，为变压器安全运行提供可靠保障。
7. 体积小、重量轻，占地空间小

High Voltage Switchgear

高压开关柜

Product introduction:

The switchgear meets the relevant requirements of the GB3906-199 "3-35kv AC Metal-enclosed Switchgear" standard. It consists of two parts: the cabinet and the circuit breaker. It has the functions of overhead inlet and outlet, cable inlet and outlet, and bus connection. The cabinet is composed of a shell, electrical components, various mechanisms, secondary terminals and connections, etc.

Cabinet material selection:

1. Cold rolled steel plate or angle steel
2. Al-Zn coated steel sheet or galvanized steel sheet
3. Stainless steel plate
4. Aluminum plate

产品介绍：

开关柜满足GB3906-199《3-35kv交流金属封闭开关设备》标准的有关要求，由柜体和断路器两大部分组成，具有架空进出线、电缆进出线、母线联络等功能。柜体由壳体、电器元件、各种机构、二次端子及连线等组成

柜体材料选择：

- 1.冷轧钢板或角钢
- 2.敷铝锌钢板或镀锌钢板
- 3.不锈钢板
- 4.铝板
